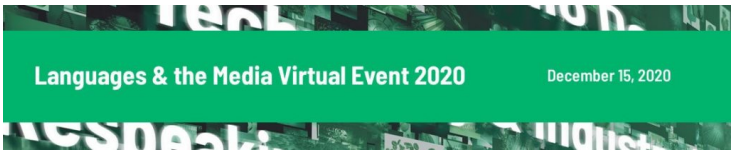
Languages & the Media Virtual Event 2020



Languages & the Media Virtual Event 2020 is taking place on **Tuesday, December 15, 2020** ? and the full programme is now online.

When we had to postpone the full conference to September 2021, we decided to host an online event this year to bring a glimpse of the Languages & the Media experience home to you. With this Virtual Event, we'll be offering our community an opportunity to come together and catch up on what has been happening in the world of content localisation and accessibility. We will be hearing from a great line-up of guest speakers about the disruptive impact of COVID-19 on the industry and how the pandemic has become a trend accelerator for cloud infrastructure and remote collaboration. TV viewing and online video consumption have boomed during global lockdowns and advancements have been made in the deployment of AI and MT in localisation processes and access services.

The **keynote** and **industry roundtable** will be followed by another special event: the **Jan Ivarsson Award ceremony** which is traditionally hosted at Languages & the Media and presented by **ESIST**.

Click here to view the programme.

Places are limited, so register now for the **Languages & the Media Virtual Event**. Secure your place to attend the live session and submit your questions to our speakers for the Q&A.

For group registrations please contact registrations@languages-media.com.
