Civic Epistemologies Workshop on the ROADMAP for Citizen Science

Developing a **Roadmap** for broadening e-Infrastructure deployment to support citizen researchers in digital culture is the main objective for the **Civic Epistemologies**, a project that has received funding from the European Union's Seventh framework Programme for research, technological development and demonstration.
Aim of this Workshop in Leuven was to present the projects results to date, in order to obtain feedback from the partners and from external experts, before finalizing the Roadmap. The Workshop was held in the beautiful city of Leuven, hosted by the Catholic University (**Katholieke Universiteit**) in the Museumzaal of the **Erasmushuis** (premises of the Faculty of Arts). The **Katholieke Universiteit** is a project partner in Belgium.
Partners and relevant stakeholder were invited e.g. the wider cultural heritage community, researchers, Citizens associations, creative enterprises and e-Infrastructure communities beyond the consortium.

More information and the programme of the event are available here.
