# Preservation as an e-infrastructure service: a Roadmap for digital cultural heritage

The Final Conference of DCH-RP Project took place at the National Central Library of Rome, and it was organised under the umbrella of the Italian EU Presidency.
The main objective of the workshop has been to provide an overview of the main outcomes achieved by the DCH-RP project, focusing on the Roadmap for Preservation of Digital Cultural Heritage and on the potential role of e-infrastructure in the preservation of DCH.
A round table discussion on the topic ?From the Roadmap to its implementation? has brought together various experts and researchers representing e-infrastructures, publishers, cultural and research institutions to discuss the sustainability of the project, giving a perspective on future activities and challenges for the implementation of an e-infrastructure-based preservation system.

**Programme and presentations**]
10.00-10.30 Welcome and Introduction, Andrea De Pasquale (Director of the National Library), Rossana Rummo (Director General for Libraries, Cultural Institutes, and Copyright)
