

DPF Manager Updates

In our **last update** we focused on explain you **what kind of improvements and new functionalities** we included in the last version of **DPFManager 3.0**. **This time** we will remind you what **DPFManager is** and what kind of technologies, processes, policies and other issues have made possible **the contribution of a new innovation in the digital preservation area**.

DPFManager is the most advanced TIFF conformance checker for digital preservation that has been created and designed by a [strong community of experts](#) who are highly interested in file format validation for digital preservation. [+Read more!](#)

DPF Manager allows archivists to know the state of their TIFF images in terms of preservation. It validates the files with the main standards (Baseline 6, TIFF-EP, TIFF-IT), and additionally checks the conformance to the newest TIFF for Archival ([TI/A](#)) Recommendations (in process of ISO standardization). Although your TIFF files are conformant to the main standards this does not guarantee long-term preservation. DPF Manager ensures you compliance to these set of recommendations, that is, your image digital assets will be prepared for digital preservation. [View the full list of functionalities here!](#)
