

DPFManager version 3.1 available to download

DPF Manager has been updated to version [Version 3.1](#). This new version includes new features, improvements and bugfixes. One important change on this release is that we have created two new independent projects for the **implementation checker** and the **policy checker** with the aim of improving the project modularity. All the projects developed by Easy Innova can be explored in our [Github repository](#), and also in the [Maven repository](#).

New Features

- Create and edit configuration files through the CLI
- Create new configuration based on an existing one

Improvements

- Improved performance for large batches of files
- Moved relaxation of standards from implementation checker to policy checker
- Created separate repositories for [Implementation Checker](#) and [Policy Checker](#)
- Updated [TIFF-IT specification](#)
- Default configuration viewable
- Smaller global reports

Fixes

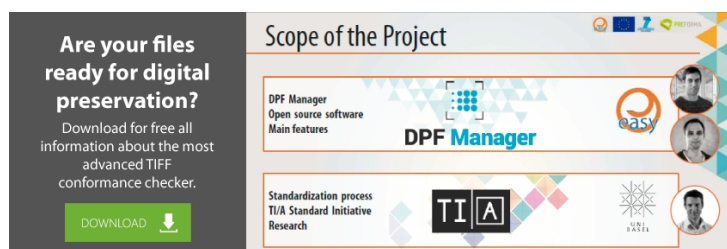

- Solved memory leaks produced when analyzing large amount of files
- Much more robustness against invalid TIFFs
- Fixed periodical checker bug in MacOS

- When an output folder is specified, check if it already exists and ask to overwrite
- Show the correct reports folder in the log messages
- Several fixes in METS report
- Uninstaller now removes all the files (when asked to)

Many of these points have been suggested by the users. So don't hesitate to use the [issue tracker](#) or any of the other channels available ([twitter](#), [forum](#)) to contact us and provide any feedback on things that could be improved.

Download NOW! Available for Mac OS X, Linux & Windows.

The banner is divided into two main sections. On the left, a dark grey box contains the text 'Are your files ready for digital preservation?' in white, followed by 'Download for free all information about the most advanced TIFF conformance checker.' and a green 'DOWNLOAD' button with a download icon. On the right, a light grey box titled 'Scope of the Project' features three horizontal panels. The top panel, 'DPF Manager', describes it as 'Open source software' and 'Main features', with a logo and a portrait. The middle panel, 'Standardization process', mentions 'TI/A Standard Initiative' and 'Research', with a logo and a portrait. The bottom panel, 'TI/A Standard Initiative', also mentions 'Research', with a logo and a portrait. The background of the right section is decorated with colorful geometric shapes and logos for 'easy' and 'PRESTO'.
