Future of Information and Communication Conference (FICC) 2018

FICC 2018 provided a forum for researchers from both academia and industry to share their latest research contributions, future vision in the field and potential impact across industries. FICC2018 allowed attendees to exchange knowledge with the common goal of shaping the future of Information and Communication.

The conference programme included paper presentations, poster sessions and project demonstrations, along with prominent keynote speakers and industrial workshops. Accepted papers were published in IEEE Xplore and indexed in Scopus, IET Inspec and many more.

Information and Communication is playing an increasing role in society and within our lives. The conference provided its attendees an uncommon opportunity to expand their network beyond their immediate professional environment. It is a unique chance to work with other accomplished individuals from diverse areas towards the common goal of shaping the future of the communication, computing and society.

FICC is part of the SAI Conferences, a group of annual conferences produced by The Science and Information (SAI) Organization, based in the United Kingdom. Previous conferences include Future Technologies Conference (FTC) in San Francisco, Intelligent Systems Conference (IntelliSys) in London and Computing Conference in London.
