

Parallel Semantic Search Across Multiple Repositories

Thanks to the collaboration between DCH-RP and [CHAIN-REDS](#) projects, a [Parallel Semantic Search Engine](#) has been integrated in the [e-Culture Science Gateway](#).

This is a standard-based web 2.0 demonstrative platform that enables search in parallel in different online repositories of linked data. The users now can search across the tens of millions of resources contained in the [CHAIN-REDS Knowledge Base](#) as well as in the [Europeana](#), [Cultura Italia](#) and [Isidore](#) repositories.

Data accessible through the eCSG are stored on the European Grid Infrastructure and are accessible through the pan-European GEANT network and the National Research & Education Networks. The service is available both in a web-based version and with a mobile app.

The eCSG was developed to show the Proofs of Concepts (PoCs) identified by the DCH-RP project and how they fit with the requirements defined in the Roadmap.
