About the ELAICH Project: [www.elaich.technion.ac.il](http://www.elaich.technion.ac.il)

## SUMMARY

eLAICH (Educational Linkage Approach In Cultural Heritage), a scientifically-based, easy, flexible educational e-learning toolkit, was developed for the general public, and especially youth, to raise awareness and develop understanding of the values of cultural heritage, and principles and the challenges of its preservation. eLAICH helps young people acquire knowledge and skills for a complex and globalizing world by instilling basic understanding of the ultimate contemporary inter- and multidisciplinary field: conservation of cultural heritage. eLAICH opens the door for the general public to the study and research of historic monuments, and, at the same time, educates responsible citizens and contributes to intercultural dialogue through the introduction of universal cultural values and preservation of multi-faceted global cultural heritage. eLAICH can be accessed by anyone and taught by any school teacher through the eLAICH e-learning platform.

## DESCRIPTION

The ELAICH (Educational Linkage Approach In Cultural Heritage) Educational e-learning Toolkit enables educators and heritage authorities to introduce the values of cultural heritage, and principles and the challenges of its preservation to youth. ELAICH, a project in the Euro-Mediterranean Heritage 4 Programme (2009-2012), developed the scientifically-based, easy, flexible ELAICH Educational Toolkit. The eLAICH e-learning Toolkit can be accessed by any citizen and taught by any school teacher through the eLAICH e-learning platform without charge or registration.

**eLAICH has been developed for youth, but any person can learn with it. eLAICH makes science accessible to citizens. It presents results of scientific research, and supports forms of scientific inquiry.**

**"Contemporary conservation of cultural heritage comprises such different areas as art, history, architecture, crafts, technology, engineering, and scientific research in different fields, e.g., chemistry, mathematics, physics, biology and nano-materials." (A. Lobovikov-Katz, eLAICH, Topic 1.1 (1), slide 38). By introducing the field of conservation to its users, eLAICH instills in them a basic understanding of the inter- and multidisciplinary character of contemporary sciences and technology. In this way, eLAICH serves the needs of learners acquiring knowledge and skills for a complex and globalizing world. The positive approach of eLAICH enables its young, virtual students to link between modern technological globalization and universal humanistic cultural values.**

**The eLAICH e-learning platform is user-friendly. It enables easy navigation and immediate access to every piece of learning material, interactive exercise, and instructions for the off-line laboratory or on-site activities, and at the same time allows successive progress through the whole eLAICH e-learning package.**

The eLAICH Educational Toolkit has been tested through a series of courses in various locations in Israel, Italy, Greece, Malta, Jordan and Turkey, including an on-line simulation course. **eLAICH has multiple and lasting community impact through the eLAICH Website and dissemination channels. Inter- and multidisciplinary value of eLAICH and its inter-cultural universal values is evidenced by continuing and increasing commitment by heritage and education authorities who apply eLAICH in their awareness, education, and training activities.**

The eLAICH Educational Toolkit provides an obligatory Basic Course and optional Advanced Topics. Users can choose Advanced Topics according to their interests.

**Through its flexibility, eLAICH addresses the learning needs of all. It provides rich learning content, assisted by on-line downloadable manuals. It combines interactive on-line educational activities and in-situ study of cultural heritage, contributing to heritage preservation by building a sense of identity, ownership and responsibility.**

**The manual – a set of introductions and guidelines (available in English, Italian, Hebrew, Arabic, Greek and Maltese) - facilitates independent learning with eLAICH.** Introductions and guidelines are provided on all levels: from the general level to the level of a single topic. Introductions explain the content, while the guidelines explain how to actually study (duration, equipment, etc.).

The eLAICH e-learning platform consists of six modules, subdivided into topics. Each module is devoted to a specific integral part of contemporary interdisciplinary conservation of cultural heritage, and linked to eLAICH's on-site teaching unit - "Adopt a site".

Please see the eLAICH video for the modules. The eLAICH modules should be studied sequentially – from 1 to 6. After Module 6 the "Adopt a site" unit should be undertaken.

The "Adopt a site" unit is based on knowledge and understanding developed through all 6 modules. It allows students to link virtual e-learning with the real world of cultural heritage. It enables them to contribute to their own cultural heritage through its study, monitoring, and documentation.

## TESTIMONIALS

**Prof. Roko Zarnic, Minister of Environment and Spatial Planning of the Republic of Slovenia, Coordinator, EUCHIC Project (2012)**

"A typical problem for students from ages 14-18 is 'what to study' – the ELAICH programme can help them by providing an idea. Students can see physics, chemistry, humanities brought together – it is good starting point for studying architecture, archaeology, chemistry, etc."

**Prof. Moropoulou (2012), Vice President - SEFI - The European Society for Engineering Education; former Vice Rector, NTUA:**

"ELAICH introduces inter-disciplinary and multi-disciplinary sciences and arts to students. As they are usually taught each subject separately, with ELAICH they see the inter-relationships of these subjects."

"All human abilities to learn are activated in the ELAICH course – spatial, linguistic, logical, mathematical, kinaesthetic, interpersonal, intra-personal, etc."

**Dr. A. Krause, UNESCO Culture Office-Venice (2011):**

" ELAICH contributes to transmit to the young generation the cultural heritage values and importance of its preservation; ELAICH is very relevant to the UNESCO peace-building policy; it might be used on UNESCO sites."

**Prof. Rene Van Grieken, former Dean of Science Department, University of Antwerp (2012):**

"Students who are shown the connection between chemistry and other subjects, like cultural heritage see the value and are more interested in chemistry".

**Prof. Guido Biscontin, University Ca'Foscari of Venice (2012) :**

"It can be difficult to work with young people but if we start, maybe they can become a civil society that can understand their own cultural heritage, if we interest young people then maybe they will become interested in other subjects like chemistry, or environmental science, archaeology. They can have a different understanding that science and humanities can work together. "

**Mrs. Noga Cohavi, Pedagogy Director and Mr. Orel Neeman, Science Director in Campus Matos, the Hebrew Reali School, Haifa (2012)** summarized the experience of the ELAICH course at school and the impact it had on their students: "The students had "learned a lot about a new way of thinking about heritage values" that they had developing teamwork, and that "our students now see the world around them differently as now every block looks different". They see history through the stones and recognize that "the responsibility is on our shoulders for future generations."

**Prof. A. Georgiadou, Greek Ministry of Education (2010):** "ELAICH is highly effective for teaching cultural heritage for youth, with added educational values to school curricula in general, and to science education in particular".

From presentations at the International conferences and from the Minutes of the ELAICH workshops, from the ELAICH Report to the European Commission, 2012

## AWARDS

### Educational Linkage Approach In Cultural Heritage (ELAICH)

#### AWARDS

- 2014 - ELAICH awarded the "Project of the Year" - First Prize in the category Research, in the framework of the International Competition 2014 of Architecture of Israel and the European Union (<http://www.aiq.co.il/gallery/1394973676.pdf>).
- 2013 - ELAICH - Inter- and multidisciplinary e-learning platform on cultural heritage conservation (<http://elaich.technion.ac.il/e-learning/>) nominated for the World Summit Award ([www.wsis-award.org](http://www.wsis-award.org)), as the best e-Content example in e-Learning & Science from Israel.

## BASIC DATA

Educational Linkage Approach In Cultural Heritage (ELAICH) - ENPI 150583 - Euromed Heritage Programme 4:

- the first Israeli-led Project in the framework of Euromed Heritage Programme;
- the first Technion-led European Project at the Technion.

#### ELAICH Consortium:

- Leader; Beneficiary: Technion – Israel Institute of Technology.
- Contributing partners: National Technical University of Athens (NTUA), University of Antwerp, University Ca' Foscari of Venice, University of Malta.

Project duration: 36 months

Project period: 2009-2012

## END-PRODUCT

# Tips on navigating through eLAICH

**WELCOME TO eLAICH e-learning platform:** <http://elaich.technion.ac.il/e-learning/>  
(at any moment you can navigate anywhere via Top Menu on every page)

Click the **Start** button. This takes you to the general Introduction for eLAICH.

Scroll down the **Introduction** page.

Watch Video 2 - a complete short guide to eLAICH  
<http://www.youtube.com/watch?v=GloGPS6uy5k>

Recommended: Download eLAICH Booklet and eLAICH Manual - provided in six languages: English, Italian, Hebrew, Arabic, Greek, and Maltese.

At the bottom of the Introduction page click the **Next** button, or, on the top menu click **Guidelines**.

On the top menu click the **content** button. You are now in the eLAICH knowledge treasury! Click on any **module** or **Adopt a site** in the picture of the vaulted structure ascending the hill of eLAICH knowledge, OR click on any title or icon of learning material/exercise /advanced material from the list below the picture. **Scroll** through the entire '100 km' list of the topics. You might choose topics of your interest, e.g., art, chemistry, materials science, architecture. eLAICH provides access to all learning materials online, and allows downloading all learning materials to a PC in order to watch them offline (note: Copyright).

The following are a few **examples** of different formats of learning materials and activities:

PPT: <http://www.elaich.technion.ac.il/e-learning/en/activities/part-i.html>

DOC: <http://www.elaich.technion.ac.il/e-learning/en/activities/lab-exercise.html>

PDF: <http://www.elaich.technion.ac.il/e-learning/en/activities/exercise-1.html>

Audio Lesson: <http://www.elaich.technion.ac.il/e-learning/en/activities/14-audio-i.html>

Video Lesson: <http://www.elaich.technion.ac.il/e-learning/en/activities/monitoring-water-the-case-of-venice1.html>

Online Interactive Exercise: <http://www.elaich.technion.ac.il/e-learning/en/activities/questionnaire-34.html>

Online Interactive Activity: <http://www.elaich.technion.ac.il/e-learning/en/activities/drag-to-match-question.html>

## Enjoy eLAICH!

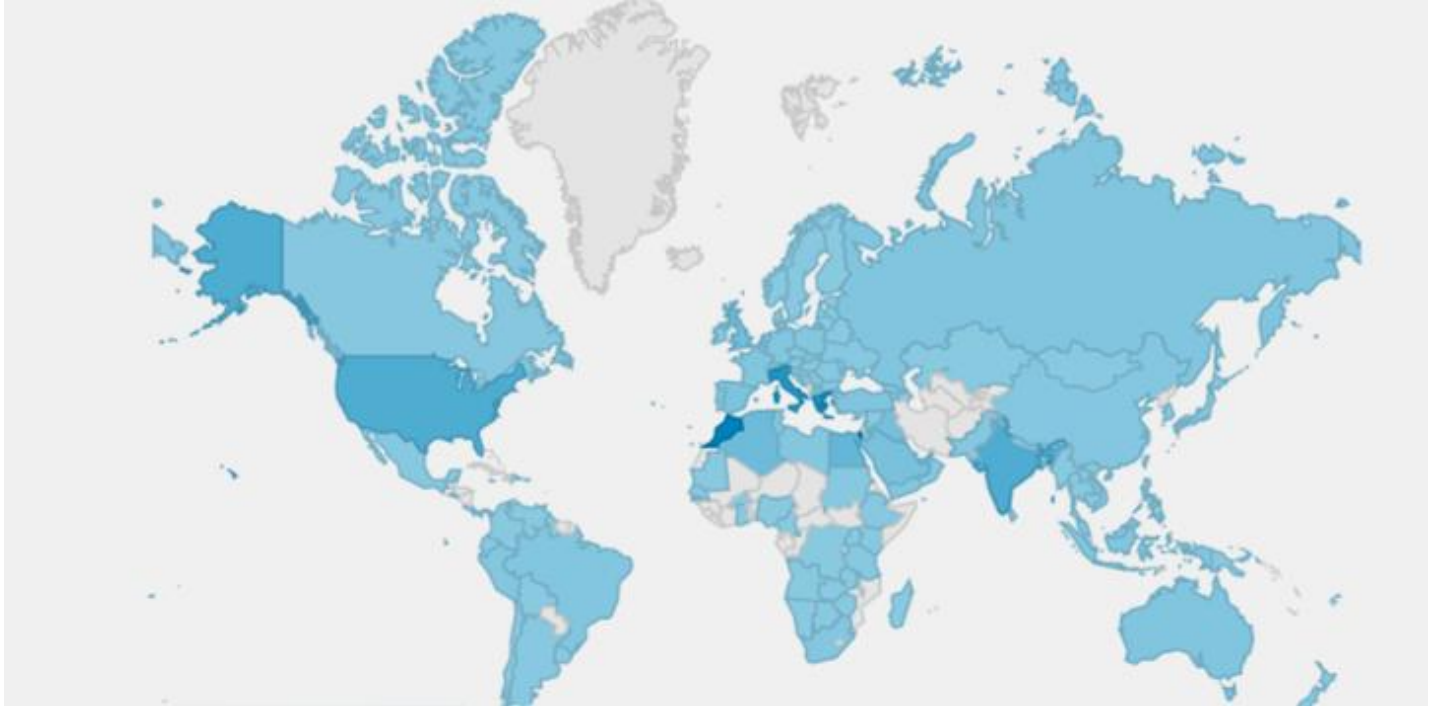

**Dr. Anna Lobovikov-Katz**
