ACE Creative - Accelerating Creative Business

As part of the European Horizon 2020 (Europe's largest research and innovation programme) **ACE Creative** is on the hunt to find the top 100 new and emerging creative companies in the EU and accelerate their growth and development.

Over the next 2 years the selected 100 SMEs (50 per year) will benefit from their very own customised support programmes delivered by ACE Creative.

The international team will then help to identify clients, investors and contacts that could help begin the process of international growth.

In addition to the customised support programme:

- The top 30 companies (15 each year) will win the opportunity to pitch to an audience of international investors at the Creative Business Cup finals in Copenhagen in November;

- Up to a further 400 SMEs will benefit from participation in one of 15 ACE Creative international Boot camps being staged across Europe in 2015 and 2016;

- A total of 1000 SMEs will benefit from the ACE Creative online support platform with access to resources in the areas of finance, networking, incubation technology and new markets.

If you have a business within the ICT and creative industries that has the potential to grow internationally, then this European creative business acceleration programme by ACE Creative, may well be of benefit to you.
