

ALCHEMIC BODY | FIRE . AIR . WATER . EARTH

ALCHEMIC BODY | FIRE . AIR . WATER . EARTH is an exhibition of contemporary art, an opportunity for international artists to exhibit their works in the **blooming Bogotá arts scene**, destination of curators and collectors from all over the world. The exhibition is focused on the **concept of transformation, starting from the alchemical processes**, that aim to **purify the nature elements: earth, air, water and fire**. The alchemists, recognized as the ancestors of modern chemists, worked to discover the **way the world is made and to modify its structure**. The mysterious practice of alchemy always influenced the art and the artists from all the centuries. **Alchemists and artists are fascinated by the concept of transformation** and they both work to **discover and create new possible worlds**. We invite artists to share their researches about the natural elements and the creative processes of mixing and changing, using the body as field of artistic transformation.
