

Announcing ?3D in Cultural Heritage? event in Rome

image of Villa Maraini, Istituto Svizzero di Roma

During [Photoconsortium's General Assembly 2023](#), that this year will take place in Rome hosted by the University of Basel in the beautiful premises of the Istituto Svizzero, a public event of the [EUreka3D](#) project's capacity building and training programme is organized on 6th June 2023.

After the welcome messages from the Istituto Svizzero, the University of Basel and Dr. Mauro Fazio, from the Ministero delle Imprese e del Made in Italy, the event opens with an introduction on EUreka3D project by Dr. Antonella Fresa (Photoconsortium), the project coordinator.

Then, the event is organized in two sessions.

During Session 1, will be discussed the current scenario where EUreka3D is involved about 3D in the cultural sector, and why reusable 3D content in good quality is needed: keynote speeches from Europeana, Marinos Ioannides (Cyprus University of Technology) and Frederik Temmermans (VUB/imec) will provide the most recent information, best practices and technological insights on the matter.

After that, during Session 2, the event will focus on important experiences of international projects dedicated to 3D digitization and the use of 3D in cultural heritage, with the contributions of Timothy Naessens (meemo), Ismo Malinen (Museovirasto), Peter Fornaro and Vera Chiquet (University of Basel), and Ana Busom Arruebo (GENCAT).

Question and answer time will allow the participants to interact with the speakers and join the conversation.

A detailed agenda will be published soon. More information about the event and how to participate: info@photoconsortium.net
