

APARSEN/SCAPE project Satellite Event ? Long term accessibility of digital resources in theory and practice

We are delighted to announce **the APARSEN/SCAPE project Satellite Event** in context of the 3rd LIBER workshop on Digital Curation ?Keeping data: The process of data curation? (19-20 May 2014).

An overview on management aspects such as digital rights management, policies and costs as well as technical aspects with a focus on preservation planning and scalability in digital preservation will be given. Insights into the day-to-day practice of digital preservation will foster the understanding of theoretical concepts developed in the two EU funded projects.

The programme on 21st May 2014 is organised by APARSEN and SCAPE project and is as follows:

<https://liber2014.univie.ac.at/satellite-event/programme-satellite-event/>

09:00 ? 10:30

Sabine Schrimpf /Stefan Hein (German National Library): **Digital Rights Management in the context of long-term preservation**

Ross King (Austrian Institute of Technology): **The SCAPE Project and Scalable Quality Control**

David Wang (SBA Research): **Understanding the Costs of Digital Curation**

11:00 ? 12:30

Sven Schlarb (Austrian National Library): **Application scenarios of the SCAPE project at the Austrian National Library**

Kre?imir ?uretec (Vienna University of Technology): **The SCAPE Planning and Watch Suite**

David Giaretta (Alliance for Permanent Access): **Digital preservation: How APARSEN can help answer the key question ?Who pays and Why??**

Location:

Austrian National Library, Palais Mollard, **Herrengasse 9** (Attention: not the main building of the Austrian National Library!), 1010 Vienna, Austria

In case you are attending the 3rd LIBER workshop register here: <https://liber2014.univie.ac.at/registration/>

If you only want to attend the Satellite Event and the SCAPE training workshop (see below), please register here:

<http://scape-aparsen-workshop.eventbrite.co.uk>

More information on the event can be found here: <https://liber2014.univie.ac.at/satellite-event/programme-satellite-event/>

Following the joint APARSEN and SCAPE satellite event, the **final SCAPE training workshop** will take place on the afternoon of **21 May from 13.30 - 18.00, and on 22 May from 09.30 - 16.30** at the Austrian National Library:

Exhibit A: The Evidence for Effective Digital Preservation

This course offers best practices for the curation and publication of experimental data on the web. This is demonstrated by applying the principles of 5 Star linked data to:

- data generated from digital preservation testing and experimentation, and
- the metadata about the tools and data that the published data depends upon.

Further information about the event

will be added to the SCAPE website shortly at: <http://www.scape-project.eu/>

and you can **register** at: <http://scape-aparsen-workshop.eventbrite.co.uk>

More information on APARSEN can be found here: <http://aparsen.eu/>
