

Archiving 2023 conference

The 2023 edition of Archiving conference is going to be held in Oslo from 19th to 23rd June 2023, at NTNU Norwegian University of Science and Technology, with the aim of bringing together an international community of technical experts, managers, practitioners, academics from cultural heritage institutions, universities, and commercial enterprises, to explore and discuss state-of-the-art imaging, digitization, preservation, and access for 2D, 3D, and AV materials, including documents, manuscripts, photographs, bound volumes, paintings, videos, and born-digital works.

The interdisciplinary focus of the conference creates a rich environment for information exchange. In addition to presenting the latest research results on digitization and curation, Archiving investigates new technologies, strategies, and policies, as well as reports on successful projects that can serve as benchmarks in the field and explores different platforms and ways of visualizing data, allowing for deeper connections with collections.
