

## Jönköpings läns museum in Jönköping, Sweden, invites Video Art Miden to present the video art exhibition "ARTificial Intelligence"

The video art selection, curated by Gioula Papadopoulou (art director and curator of Video Art Miden) presents **8 works that deal with various concepts concerning the 'homo digitalis' era and artificial intelligence**, exploring the physical detachment and the gradual digitalization and virtualization of our world, our societies and our minds.

**All works** have one thing in common: they **are tracing and decoding human behavior in the digital era and explore our relationship with our self and 'the other'**. What do we have to sacrifice in order to approach a supposedly perfect future world?

### Participant artists/works:]

- Juergen Trautwein & Silvia Nonnenmacher, Meta\_Face, USA 2017
