

"Better cross-border travel: Europe's external borders and freedom of movement"

As global mobility rebounds and digital innovation reshapes travel, the EU is taking steps to modernize and streamline cross-border travel.

An exclusive webinar is taking place on 10/09/2025 exploring the future of travel in Europe ? from digitalisation of Schengen visa procedures to smart travel documents and faster border processes.

Industry experts from aviation, rail, road and cruise sectors will share practical insights, while European Commission representatives will provide updates on the Entry/Exit System (EES) and the European Travel Information and Authorization System (ETIAS). The session will also reflect on digital health certificates during the COVID-19 pandemic and their lasting impact on international mobility.
