3D technologies offer opportunities to broaden access to culture, preserve our shared cultural heritage and spur creativity and innovation. As part of an ongoing series from the EuropeanaTech community, a new blogpost is available to all heritage researchers, professionals and technology partners that touches on core topics relevant to the digital transformation of cultural heritage sector: 3D and IIIF.

Dr. Lozana Rossenova Postdoc Researcher at TIB - Leibniz Information Centre for Science and Technology, explores how interoperability for 3D is a key goal for the International Image Interoperability Framework.
