

## CALL FOR APPLICATIONS - bang.prix 2020 digital artists

**bang. Prix** is Turkey's leading platform where art, design, technology and science intersect, founded in 2015 by a team of interdisciplinary minds with backgrounds in various fields and the common desire to share their curiosities and develop beyond the scope of their fields.

To date, bang. Prix has provided the support and mentorship to 57 participants in the development of their projects, showcasing them to thousands of audiences in 13 exhibitions in Turkey and abroad. In its fourth year, bang. Prix is expanding beyond support for project-based development and exhibitions as a platform that supports practitioners from different disciplines and countries to develop themselves at the nexus of art, technology, design and science.

Under the scope of the bang. Prix 2020 program, we open our call for applications to those interested in participating. The program provides resources, mentorship and networking opportunities customized to each participant.

For more information about what the program offers, please visit the website here: <http://www.bangprix.org/eng.html>

Applications are accepted during the period of 11 November - 31 December 2019. A selection committee consisting of 5 external jury members and the bang.prix team will select the finalists to participate in next year's program (January 2020 - November 2020). Application results will be released at the end of January.

Application is free of charge.

### **Who can participate?**

Creatives who apply digital technologies or science, including:

- ? Artists
- ? Designers
- ? Architects

Professionals from science and technology fields expanding their practices to include artistic approaches. These fields may include:

- ? Neuroscience
- ? Biology
- ? Computer Science
- ? Sociology
- ? Philosophy
- ? Psychology

Priority will be given to those at early stages of their career, but applicants looking for opportunities will also be considered. The program is international and open to any nationality and country of residence. Individuals and groups/collectives may apply.

While the program is flexible for participants based in different countries, selected participants are expected to communicate openly and promptly and dedicate time from their usual activities to program activities throughout the program period (Jan - Nov 2020).

### **Evaluation criteria**

Applicants are judged on the following criteria:

- ? Level of curiosity and motivation towards working in the intersection of art, science, design and technology
- ? Need for support provided by the bang.prix program
- ? How realistic the development goals are
- ? Clarity in expression of the applicant's self and work
