

CALL FOR WORKS for QueerTech.io 2019

QueerTech.io 2019 is an annual URL+IRL exhibition of online digital media artworks by queer identifying artists from around the globe, presented by Midsumma Festival and QueerTech.io. This year QueerTech.io are introducing modest artist honorarium for selected works. The work will be shown online and in physical locations (tbc) as part of the Midsumma Festival in Melbourne from 18 January 2019.

The call for works will close Sunday 25 November. If your work is selected, it will be embedded in the QueerTech.io website as part of the online (URL) exhibition.

We are particularly interested in interactive online works and games but also include video art and screen based works. The website is the main game ? we are super interested in **interactive internet art projects, games and whatever** you got. #NSFW is ok but might not get shown in some public contexts.
