

DCH-RP @ CIDOC 2014 Conference

Dresden, 06.09.-11.09.2014

A paper presenting the DCH-RP Roadmap for the long-term preservation of digital cultural content has been submitted and presented at the CIDOC 2014 Conference in Dresden.

Digital Cultural Heritage Roadmap for Preservation (DCH-RP) is a project supported by EC FP7 e-Infrastructures Programme. It seeks to look at best practice for preservation standards in use, and has created a 'roadmap' which will give a way forward for the sector.

The Roadmap is built on two basic assumptions:

- Existing e-Infrastructures for research and academia are also efficient channels for the delivery of advanced services to be used by the digital cultural heritage sector for distributed digital preservation;
- That it is possible to establish common policies, processes and protocols which will allow digital DCH organisations to access e-Infrastructures.

The aim of this paper is:

- To make CIDOC Conference participants aware contents of the Roadmap;
- To give participants an opportunity to give feedback about the Roadmap;
- To seek support for the Roadmap.

The [presentation](#) was delivered by Gordon McKenna in the session Session G/1, *Digital Long Term Preservation* on Tuesday 9th September 2014 and the paper will be published in the conference proceedings.
