DI4R 2017 - connecting the building blocks for Open Science

Once again this year, EUDAT is co-organising the **Digital Infrastructures for Research** (DI4R) event together with RDA Europe, PRACE, EGI, OpenAIRE and GÉANT. The event takes place in the heart of the European Union in **Brussels** (Belgium) on **30th November and 1st December 2017**, hosted at the stunning Square in the city centre and co-located with the first **EOSCpilot Stakeholder event** (28-29 November 2017).

What's new?
This year the conference will revolve around the theme ?**Connecting the building blocks for Open Science**? with the overarching goal of demonstrating how open science, higher education and innovators can benefit from these building blocks, and ultimately to advance integration and cooperation between initiatives.
This is the reason why EUDAT encourages all researchers, developers and service providers to have their say in the conference by submitting an abstract for a 5-minute lightning talk, a 15 minute presentation, an interactive session (90 mins), a poster or a demo (see call for abstracts). The call is now open and closes on 13th October 2017 (click here to submit)!
Registration to the conference is also open: make sure you register by 31st October to benefit from the early-bird rate!
