Digital Archiving Futures

Digital Archiving Futures

Research Centre Digitalia, together with other Mikkeli Memory Campus organizations, organizes a three-day hybrid event called **?** Digital Archiving Futures?] **on the 4?6 of September 2024 in Mikkeli, Finland and online stream.**
The event is free of charge for participants and is part of the project ?Memory Campus as an International Cluster for Information Management?, funded by the South Savo Regional Council from funds allocated to supporting the sustainable growth and vitality of regions.
Register to the event before June 24, 2024.

Programme and Speakers
The main themes of the conference will be **Data Spaces, Artificial Intelligence, and Cluster Collaboration**, featuring speakers from the GLAM sector and information management field from Finland and across Europe.
The ?Data Spaces? theme of the event will cover perspectives on data space, shared data and also more specifically development activities in different networks related to this topic.
The ?Artificial Intelligence? aspect will highlight future possibilities for the use of artificial intelligence in the archive, library and museum sector, as well as in the field of information management in general.
The ?Collaboration? theme brings together the strong role of cooperations in creating the future, in terms of co-development and co-creation, ecosystem collaboration and interconnection with other actors to develop a common future and knowledge.
September 5's program includes Europeana Network Association Board Member and Time Machine RFC Editor **Juha Henriksson**'s presentation ?Europeana, Time Machine, and the European data space for cultural heritage?.
