eafip Workshop for public procurers in the Energy sector

The **eafip Workshop for public procurers in the Energy sector** (ministries, regional and local authorities, agencies, public utility entities, etc.) will be held in the Europahuset in Stockholm, Sweden on the 23rd November 2016.

The aim of the event will be to highlight the benefits of innovation procurement of ICT solutions through the Pre-Commercial Procurement (PCP) and Public Procurement of Innovative Solutions (PPI) approaches across Europe, with a particular focus on the framework of exploration, extraction, production, transport and distribution of energy.

The workshop will feature:

- Presentation / networking discussion on the EU funding opportunities for PCP and PPI (in the framework of the Horizon 2020 calls).
- Presentation of case examples and lessons learned.

Presentation / networking discussion on the eafip Toolkit (aimed to support you in preparing your innovation procurement).

The workshop is open to public contracting authorities who have a unique chance to openly discuss unmet procurement needs, innovation concepts, project ideas, and much more. All procurers have an opportunity to briefly present their ideas / plan / projects in the parallel sessions.

Please note that this event will be held in English.

Download here the provisional agenda.
