# EAGLE Mediawiki awarded as Best DH Tool or Suite of Tools

EAGLE Mediawiki has been awarded as Best DH Tool or Suite of Tools at the Digital Humanities Awards 2016, an international prize yearly bestowed to Resources in Digital Humanities.

EAGLE aims to build a multi-lingual online collection of millions of digitised items from European museums, libraries, archives and multi-media collections, which deal with inscriptions from the Greek and Roman World. The aim of the network is to make available the vast majority of the surviving inscriptions of the Greco-Roman world, complete with the essential information about them and with a series of peer-reviewed translations in several European languages. These are notoriously unavailable for inscriptions, as photos. EAGLE Mediawiki is designed to give a tool to anyone interested in bridging this gap and contributing translations of inscriptions, either by providing groups of translations or providing new ones. Mediawiki is the software installed on the EAGLE website, and it uses the additional extension Wikibase to produce seamlessly for users, machine readable data.

Digital Humanities Awards are a set of entirely open annual awards run as a DH awareness raising activity. The awards are nominated and voted for entirely by the public. These awards are intended to help put interesting DH resources in the spotlight and engage DH users (and general public) in the work of the community. Awards are not specific to geography, language, conference, organization or field of humanities. There is no financial prize associated with these community awards.
