

EOSC Symposium 2023, the European Open Science Cloud annual event

From 20-22 September 2023, the **EOSC Symposium** will take place in **Madrid**, in the context of the Spanish Presidency of the Council of the European Union. The EOSC Symposium is organised by the **EOSC Future** project, together with the EOSC Tripartite collaboration (the **EOSC Association**, the **EOSC Steering Board** and the **European Commission**).

This year's event will be fully hybrid, facilitating broader exchanges between stakeholders from ministries, policy makers, research organisations, service providers, research infrastructures and research communities driving the development of and engagement with the European Open Science Cloud. In the context of the EOSC Future project, the EOSC Symposium will also be a critical platform to showcase project achievements and key exploitable results.

Under the heading 'Taking EOSC into the future', the Symposium will take on pressing topics and more around EOSC's sustainability:

- EOSC after 2027
- Governance and guidelines

Impact on the European Data and Infrastructure ecosystem

- and more!
