EOSC Symposium 2024

The EOSC Symposium 2024 will be a critical event on the path to EOSC post-2027. It is a key event to network and exchange ideas with policy makers, funders, and representatives of research institutions, research communities, and data- and e-Infrastructures active in the EOSC ecosystem.
The EOSC Symposium 2024 will take place on 21-23 October 2024 at the H4 Hotel Alexanderplatz in Berlin, under the patronage of the German Minister for Education and Research Bettina Stark-Watzinger.

It is divided into twenty-six sessions that address, among other things, the ambitions of the EOSC Tripartite Partnership, the EOSC Federation, the launch of the EOSC EU Node, the EOSC landscape, including the European Common Data Spaces and the Artificial Intelligence trends, and the impact and contributions of stakeholders.

Online streaming will be available, registration required.
