Urban Challenges and Sustainable Technological Revolution

The European Regional Science Association (ERSA) is the supranational grouping of national regional science associations across Europe.

ERSA Congress 2023: CALL FOR PARTICIPATION OPEN UNTIL 8 January 2023

This year's edition will focus on **?Urban Challenges and Sustainable Technological Revolution?** with a comprehensive programme including a wide range of sessions by researchers and experts from all around the world.

The congress is aiming to feature the numerous urban challenges and innovation that will promote the sustainability on technological revolution in cities. It will bring together researchers from academia, the private and public sectors, also non-governmental organizations, in an effort to present and discuss prevalent urban and regional development issues and to share knowledge, viewpoints, methods and research outcomes.

With approximately 800 participants every year from all continents, the ERSA congress has become the largest academic conference in regional science worldwide. There is simply no better place to present your research results, get precious feedback and network as well as find out about new developments in the field, and also meet colleagues and friends.
