The EUreka3D-XR project is reaching its conclusion, and has wrapped up its public event in Cyprus with a rich programme that included demonstrations, roundtables, keynote talks, exhibition spaces and more.

The **Digital Cultural Heritage in the Era of AI and Extended Reality** event showcased the project's key outcomes and achievements through public presentations delivered by project partners and invited experts in the field. Additionally, a posters exhibition and demonstration booths were available for exploration at the same venue.

The event was held in the context of the Digital Heritage Summit 2026 in Cyprus and was accompanied by additional events:

24 May: on-site milestone demonstration of the EUreka3D-XR's pilot of Saint Neophytos and the Enkleistra's Memory Twin and XR experience for participants.
25 May: Internal project meetings and discussions held with EUreka3D-XR partners and Advisory Board members; participation to the Europeana Network Association event in the afternoon.
26 May: EUreka3D-XR final conference and two roundtables in the afternoon.

You can find the recording of the Conference, more pictures and information on the project's website - follow this link<<<<

The Digital Heritage Summit 2026 is continuing with more interesting activities this week, including the HackIt!4EU Hackathon (May 27-28).

EUreka3D-XR project is co-financed by the Digital Europe Programme of the European Union.
