EUDAT News bulletin

Registration now open!
Focusing on **bringing data infrastructures to Horizon 2020**, the EUDAT conference is an unmissable event for anyone interested in managing and manipulating data. Beginning immediately after the **RDA 4th Plenary**, the conference offers an ideal opportunity to learn about solutions for data infrastructure and help ensure these are tailored to user needs, as well as exploring how to give research communities control of these tools. Find out how EUDAT common data services can meet your data-management needs, ultimately helping you transform data into knowledge, and learn what the future holds in this area, with the focus on Horizon2020. Visit the EUDAT website to **view the draft programme** and **register online**.

Showcase your work at the EUDAT conference poster session
Are you researching issues surrounding data infrastructure and management? Display your findings to key figures in the field at the conference by submitting a poster - find out how by visiting the **poster section on the EUDAT website**.

Learn about the crucial issues affecting sustainable data infrastructure
One of the main issues in the field of data infrastructure and management is sustainability, with legal concerns being one area of specific focus. EUDAT is here to help: its **Legal Issues in Research Data Collection and Sharing** series provides essential information to help providers better understand the issues which affect them. The course, aimed at researchers, data managers and citizen scientists, is currently composed of three modules: **Intellectual Property Rights, Personal Data** and **Service Provider Liability and Terms of Service**. Learn more and **download the training presentations from the EUDAT website**.

Be a part of the European Ontology Network (EUON) - workshop 25 September
Community-driven and voluntary, EUON brings together people working in ontology and the broader area of semantics in Europe. By sharing experience and expertise, participants can discover how semantics are applied and tools used in different fields, as well as grappling with issues such as standardising terminology. A EUON workshop is being organised as part of the EUDAT conference featuring talks by **Professor Robert Stevens** (University of Manchester) and **Jean-Pierre Evain** (European Broadcasting Union). Interested in participating? The call for abstracts has been extended to **7 July - submit yours now via the EUDAT website**.

And finally... the EUDAT conference will bring together users and providers of data infrastructure from all over Europe, so don't miss your chance to get to know your colleagues in the field. **Networking cocktails** on 24 and 25 September offer the ideal opportunity to meet likeminded professionals and follow up on ideas. We look forward to seeing you there!.
