

EUreka3D at European Heritage Hub Forum in Bucharest

Championing a responsible digital transition for and with cultural heritage

Bucharest and online

7th October 2024

Building on the outcomes of the first European Heritage Hub Forum held in 2023 in Venice, which explored the role and impact of cultural heritage in Europe's green transformation, this second Forum delved into the **challenges and opportunities presented by digital transition**.

The Forum was organised in the frame of the [European Heritage Hub EU-funded pilot project](#), with the vital input of all Hub partners and powered by Europeanpeana. It was a key component of the [European Cultural Heritage Summit](#) organised by Europa Nostra under the High Patronage of the President of Romania and in cooperation with and support from the European Commission.

The event included an **interactive exploration and fair** to showcase a diverse array of projects, initiatives, and best practices that harness digital technologies to enhance sustainability, inclusion, and diversity in the heritage sector.

Final programme of talks and exhibitions ([PDF link](#))

EUreka3D project was showcased at the fair by partner Europeanpeana, with a roll up banner, poster and sharing informative materials and disseminating about the project's upcoming events (the second webinar series "[Transforming Heritage](#)" organized in collaboration with ICA, and the [final conference](#)).
