The [European Researchers' Night](#) is a Europe-wide public event, which displays the diversity of science and its impact on citizens' daily lives in fun, inspiring ways. This year, the event will take place in 26 EU countries on **Friday 29 September 2023**.

At the event in Nicosia, organised by the Research and Innovation Organisation and the Deputy Ministry of Research and Innovation, EUreka3D was hosted at the booth of the CUT Cyprus University of Technology, one of the largest stands on the Exhibition area, to showcase the project's main mission, piloting actions and current results. Over 1.900 persons visited the stand and could learn about various ongoing projects including EUreka3D.

The European Researchers' Night aims to bring research and researchers closer to the public; promote excellent research projects across Europe and beyond; increase the interest of young people in science and research careers, and showcase the impact of researchers' work on people's daily lives. The European Researchers' Night attracts each year more than 1.5 million visitors in Europe and beyond.

Eureka3D project is co-financed by the Digital Europe Programme of the European Union.
