

EUreka3D-XR at the Immersive Heritage Conference 2026

EUreka3D-XR project will be presented in Timișoara in March, during the very first edition of Immersive Heritage Conference, taking place at Politehnica University of Timișoara (Romania), from 18-20 March 2026.

The Conference is organized by Lip3D project, an initiative with the mission of experimenting with innovative tools, methods, and practices to create immersive virtual worlds, with a special focus on archaeological sites - aim that bonds strongly with the beliefs and purpose of the EUreka3D initiative, creating synergies between the two projects.

EUreka3D-XR will be present at the event, with project coordinator Antonella Fresa delivering a presentation to disseminate the project's achievement and objectives and present the EUreka3D Data Hub.
