EUreka3D presented at CHNT30

During the Conference on Cultural Heritage and New Techonologies (November 2025), EUreka3D-XR projecy was presented by Prof. Dr. Sander Münster (Time Machine Organization; Jena University) at the "Metadata standard for 3D data. Challenges in 3D models documentation" Round Table.

During the roundtable, Prof. Münster mentioned the joint work that EUreka3D and other projects related to the Data Space for Cultural Heritage are carrying out in the 3D Working Group led by Europeana, also highlighting EUreka3D's results in supporting the quality of 3D digitization and documentation of cultural heritage - referencing the VIGIE Study, the 3D Digitization Guidelines, and the online training course.

The presentation highlighted the important synergies of EUreka3D with other projects supporting the data space and can be viewed at this link.

 EUreka3D-XR project is co-financed by the Digital Europe Programme of the European Union.
