EUreka3D presented at "Shaping the world of 3D" workshop on 29 June

DANS, a Dutch institute specializing in research data management and based in The Hague, is organizing a workshop on 3D, ?Shaping the world of 3D', to discuss data management issues related to 3D datasets in cultural heritage and archaeological research, such as data storage and data formats.

The workshop will address the issues regarding the production of 3D models and visualisations, and more, by bringing together the Dutch research community dealing with 3D research data in cultural heritage. This day-long specific focus on 3D digital data with presentations by experts and open discussions, will result in a roadmap to improve the infrastructure for 3D dataset management and reuse.

Valentine Charles, Data Services Director at Europeana Foundation, will have the pleasure to intervene during this eminent workshop presenting EUreka3D, a project that supports the digital transformation of the cultural heritage sector, offering capacity building, training, and more to Cultural Heritage Institutions facing the challenge of advancing in the digitization effort.
