

EUreka3D-XR featured at the International Archives Congress 2025

EUreka3D-XR project was presented at the [International Archives Congress 2025](#), the most important event for the archival community: held in the city of Barcelona after taking over from other major cities, the fourth edition of the event hosted around 2,000 professionals from more than 100 countries around the world.

David Iglésias (CRDI - Ajuntament de Girona), with the speech **The Role of Archives in the 3D Transformation of Heritage** addressed the importance of archival records in the progress of recreating heritage objects in 3D, especially referring to the Girona scenario in the context of EUreka3D-XR, where will recreate the city's medieval wall, which was demolished in the early 20th century, serving as a case study for assessing the archival contribution to the creation of 3D digital content related to heritage.

EUreka3D-XR project is co-financed by the Digital Europe Programme of the European Union.
