EUreka3D-XR at AI for 3D Digital Twins in Cultural Heritage

The "AI for 3D Digital Twins in Cultural Heritage Stakeholder Forum" is an event organised in the framework of the ApplyAI Strategy by the European Commission (DG CONNECT) and the Online Competence Centre in 3D for Cultural Heritage, supporting the uptake and scaling of AI technologies to create high-quality 3D digital twins of cultural sites and artefacts. It features presentations of European projects and initiatives, including EU-, national- or regional-funded ones.

During one of the morning sessions, **AI for scaling up 3D digitisation & enhancement**, EUreka3D-XR partner's Swing.it is going to present one of the five open-access tools, the AI 3D Builder, through a presentation titled **AI 3D Builder: the Accessible Pipeline for 3D Reconstruction for CHI**.
