IIIF Annual Conference

International Image Interoperability Framework (IIIF) is a set of open standards for delivering high-quality, attributed digital objects online at scale. It's also an international community developing and implementing the IIIF APIs. IIIF is backed by a consortium of leading cultural institutions and it's a useful resource for researchers and developers.

The latest Conference will be hosted jointly by the University of Naples Federico II and the IIIF Consortium.

The IIIF Showcase, that will take place on June 5 is free for anyone to attend, and it's aimed at newcomers to IIIF and locals*. Attendees will receive an introduction to IIIF, including an overview of what it does, use cases, how a wide variety of institutions implement it, and how to contribute to the community.

The IIIF Annual Conference, on June 6-8 is aimed to a wide range of participants and interested parties, including digital image repository managers, content curators, software developers, scholars, and administrators at libraries, museums, cultural heritage institutions, software firms, and other organizations working with digital images and audiovisual materials. Discounted tickets are available to IIIF Consortium members.

To learn more about the event and to register, click this link. Contact staff@iiif.io if you have any questions. Registration close on May 16th.

* Pre-registration is required and space is limited to the first 150 registrants.
