

Immersive Heritage Conference

UP Universitatea Politehnica Timisoara

1st CONFERENCE IMMERSIVE HERITAGE

Join experts, researchers, creatives, and institutions in exploring the future of digital cultural heritage through XR, AR, VR, and gamification. Hosted in Timisoara, European Capital of Culture, the event highlights how immersive technologies bridge the physical and digital past, offering innovative approaches to heritage preservation and valorisation. The Immersive Heritage Conference is the platform where 3D innovation, Virtual Reality (VR), and Augmented Reality (AR) meet history, offering revolutionary solutions for interacting with the past. We explore how immersive technologies can transform historical sites into educational and cutting-edge research environments, contributing directly to the academic prestige and international recognition of local institutions, such as Politehnica University Timisoara.

18-20 MARCH 2026

© 2026 Immersive Heritage. Organized by Politehnica University of Timisoara.

The 1st Immersive Heritage Conference will bring together leading experts, researchers, creatives and institutions in exploring the future of digital cultural heritage through immersive technologies ? XR, AR, VR and gamification, and how new technologies are transforming the way heritage can be preserved, interpreted, and experienced.

The event will be divided into three different days, that aim to tackle three different specific areas: Immersive Tech, Metaverse and Research & Policy. By participating, you will be able to join leaders in the cultural heritage and technology sector for a pioneering event in the field of heritage preservation and valorization by registering to the conference.
