On 27 and 28 April 2023, the third general assembly of INCULTUM takes place in Sweden, hosted by partner Uppsala University, also leading the INCULTUM Pilot 10 Escape into the Archipelago Landscape. This meeting marks the conclusion of the project's second year, and it will be dedicated to a global internal review of the project, carefully analysing the progress and challenges in each Work Package, as reviewed with the various activity leaders.

A special focus on Innovation will be dedicated to continue the discussions, exchanges and synergies among the partners and the Pilots in particular, who developed interesting innovation routes in their locations. Guided by the INCULTUM Innovation Manager dr. Vincent Guichard from Bibracte, this session will review the work done so far in fostering promotion of the territories by participative approaches of the local communities and by new tools and actions deployed by the Pilots.
