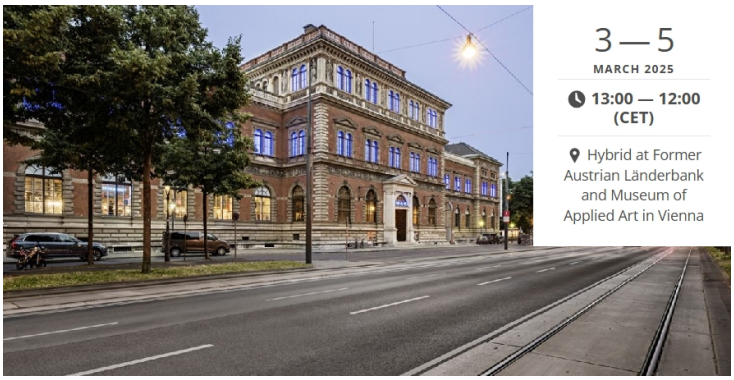
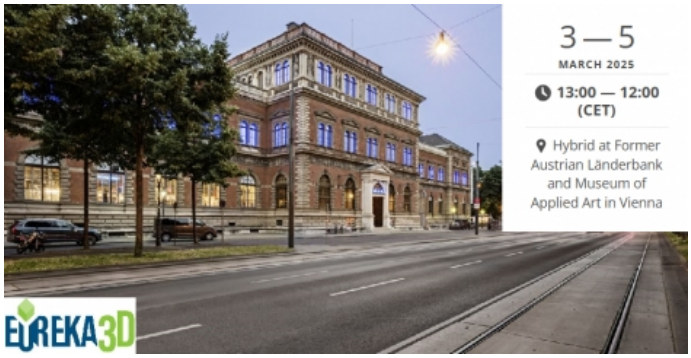
"Innovation through Heritage: Resilience in Times of Climate Change" Conference dealing with relevant topics for EUreka3D-XR





With EUreka3D-XR keeping up the work of EUreka3D and embracing its values, the awareness on climate change and its impact on the Cultural Heritage sector is still in the project's priorities.

As an important event to follow closely about this matter, "**Innovation through Heritage: Resilience in Times of Climate Change** " International Conference will explore how national and European research and funding policies can unite to make cultural heritage resilient in the face of climate change.

Organized by the Alliance for Research on Cultural Heritage in Europe (ARCHE) and hosted by Time Machine Organization, the conference will discuss various relevant themes that the EUreka3D-XR pays close attention to, about the impact of climate change on the environment and how the cultural heritage sector is addressing its challenges.
