

Introduction of the XR toolkit and Data Hub for meemoo staff

On April 20 2026, meemoo the Flemish Institute for Archives organised a successful event to train its staff: the event provided an introduction to the XR toolkit developed within the Eureka3D-XR project and to the Eureka3D Data Hub.

The event involved 55 people on site and more online, who were able to expand their knowledge on a increasingly relevant aspect of technology that is becoming more closely related to the cultural heritage sector, with the guidance of professionals with experience in the area of XR and within the EUreka3D-XR project.
