Luminous interactive installations at Stavros Niarchos Park in Athens

Athens Digital Arts Festival (ADAF), undertook the art direction and curated the luminous interactive installations at **Stavros Niarchos Park** of the Stavros Niarchos Foundation Cultural Center, in Athens.

The Stavros Niarchos Park is full of light and sounds, through a series of interactive installations forming a magical winter wonderland.

Explore the Stavros Niarchos Park, walk past or through the installations, discover the light frames, upload your selfies and immerse yourselves in a unique holiday **festival of lights**, curated by Athens Digital Arts Festival (ADAF).

Moreover, especially for the **SNF RUN 2019 FIRST RUN** 4k race organized by the Stavros Niarchos Foundation, Athens Digital Arts Festival (ADAF) has created a unique interactive and participatory installation. **Finish Line Digital Canvas** will display runners as they cross the finish line in real time, forming a mosaic of human bodies. As participants run to the future, ADAF will bring them even closer by enhancing their experience by imprinting them on a **digital canvas** that will unite individual efforts into a collective body.

An exclusive grant by the Stavros Niarchos Foundation. Free Entrance. The installations will be on display until January 7, 2019.
