MediaConch Users Survey

MediaArea is immensely grateful to have been involved in the PREFORMA challenge over the past three years. Through this initiative, MediaArea has been given the opportunity to further contribute the cultural heritage sector through the development of the open source audiovisual conformance checker tool, MediaConch.

To better understand our users and plan more efficiently for the future of this software, MediaArea would appreciate your feedback via this MediaConch Users Survey.

This survey expects that you have used MediaConch in some capacity. This survey should take 5-10 minutes to complete.
