Explore all objects published on Europeana ingested through EUreka3D-XR

Starting today, it is possible to explore every single object that has been ingested on Europeana through EUreka3D-XR project.

Produced by project coordinator Photoconsortium, two new galleries are now available on Europeana: one where all the 3D digitised, reconstructed and produced within EUreka3D-XR are grouped together, and a second one that focuses specifically on the work done in collaboration between EUreka3D and Twin it! (June 2023 ? June 2024).

Explore the galleries:

[All the 3D objects ingested through EUreka3D-XR]
[EUreka3D and Twin.it]

EUreka3D-XR project is co-financed by the Digital Europe Programme of the European Union.
