New EUreka3D-XR galleries published on Europeana

"Fouille archéologique", provided by Bibracted EPCC. CC-BY-SA

Following the most recent (and still ongoing) aggregation of new objects digitized in the context of the EUreka3D-XR projects, four new galleries on Europeana were created by Bibracte.

Start your journey:

The Hidden Side of Bibracte
A Gaulish public space: the PC15 terrace of the Bibracte oppidum]
A large Roman house: domus PC1 at the Bibracte oppidum]
An archaeological field school: domus PC2 at the Bibracte oppidum]

All galleries include both 2D and 3D objects, and will be enriched with additional objects and videos as soon as they will be available on Europeana.

EUreka3D-XR project is co-financed by the Digital Europe Programme of the European Union.
