No Time to Wait! 2

The PREFORMA project and MediaArea are pleased to announce initial details for a 2nd No Time to Wait! symposium, hosted by the Österreichisches Filmmuseum - Austrian Film Museum. Members of audiovisual archiving, digital preservation, open media development, and open format standardization communities as well as curious onlookers are welcome to attend, discuss, and present on subjects pertaining to the intersection of open media, standardization, and audiovisual preservation.

What
A FREE two day symposium focused on open media, open standards, and digital audiovisual preservation hosted by Österreichisches Filmmuseum - Austrian Film Museum and MediaArea.net. The event will feature presentations and discussion on topics such as:

- active open media standardization projects
- examination of open media use in film and video digitization
- validation and conformance checking of audiovisual formats
- integration of open source tools into archival workflow
- examples of cross-community collaboration and skill-sharing
- and more

The event will also present on the current state of the IETF's CELLAR working group's progress to develop specifications for Matroska and FFV1 as well as efforts to design and extend software in support of these formats. This event provides an opportunity for format inventors, developers, specification authors, and archivists to collaborate and advance audiovisual preservation formats.

When
Thursday, November 9 and Friday, November 10, 2017

Where
Österreichisches Filmmuseum - Austrian Film Museum
