

PAGODE at Europeana Aggregators Forum

The Europeana Aggregators Forum is the gathering where twice a year **the community of Europeana most trusted partners meets** to review strategies and collaborations, and make plans for the future. All the aggregators work with cultural heritage institutions to gather authentic, trustworthy and robust cultural data and make it accessible through Europeana. Through the Europeana Aggregators Forum, aggregators work to **exchange the knowledge and best practice that support the digital transformation of cultural heritage institutions**.

Due to the covid-19 restrictions, that of 6-7 May 2020 was the first only-virtual meeting, and despite it was a bit sad not to meet in person, the plenary and the various breakout session were perfectly working and efficient. [PAGODE](#) was enthusiastically presented to colleagues with a video and a short pitch]. A call to networking to other aggregators and cultural heritage institutions was also launched in the light of having PAGODE as a seed for a new community around Chinese cultural heritage in Europe.
