Photomediations in Danish language

Photomediations: An Open Book is the major outcome of Open and Hybrid Publishing Pilot of Europeana Space.

Through a comprehensive introduction and four specially commissioned chapters on light, movement, hybridity and networks that include over 200 images, Photomediations: An Open Book tells a unique story about the relationship between photography and other media.

Making use of the open licence of the Photomediations book, the Danish journal/website **BAGGRUND** has translated Chapter 1, ?Photography, Optics and Light' from it and has also published some photographs from the book: http://baggrund.com/fotomediering-lys-optik-og-fotografering/
