PREFORMA at PRESTO4U WORKSHOP

PREFORMA project has been presented by Erwin Verbruggen (Netherlands Institute for Sound and Vision) at the PRESTO4U workshop **Digital AV Archiving Workflows; Digitisation, Ingest, Preservation, Conversion, and Delivery**.

The workshop, which was held on 22 and 23 September 2014 in Copenhagen, did bring together a group of experts involved with digital AV masters, their creation, storage and delivery. Through presentations of real cases, the workshop gave an opportunity to learn about the technical and practical details of AV preservation and engage with experts in the field. Emphasis were given to the complex workflows required in digital master management and the practical implementation of storage and delivery solutions.

The workshop did focus on digital film and AV master handling and management, and therefore predominantly addresses the issues of the Presto 4U Film Collections and Filmmakers community. The workshop were also of relevance to the Presto 4U communities of video and post production, broadcasters and footage sale archives.

Download the presentation of PREFORMA: "Separate pasts, common futures: Digital film preservation in a broadcast environment ".
