Preserving PDF: identify, validate, repair

This event, organised by the **Open Planets Foundation** on **1-2 September 2014** at the **German National Library of Economics in Hamburg**, focuses on the PDF file format and associated tools. The themes that have been identified for the event are:

- Check the validity of the files and whether they are encrypted
- Perform quality assurance checks after migration, using comparison tools
- Investigate error messages, repair the problems, and build a knowledge base
- Improve and document JHOVE validation

Olaf Drümmer, Chairman of the **PDF Association** will present the industry perspective and hold an open Q&A session.

The full agenda is expected to be available by the end of June 2014.
