

Invitation to participate in the Online Survey "Shaping the future of heritage digitisation"

Invitation to Participate in the Online Survey
Shaping the future of heritage digitisation
By the Memory Twin Alliance and the EU HERITALISE Project

This 15 minute survey seeks your insights into:

- Institutional readiness for digitisation
- Digitisation barriers and opportunities
- Developing digital strategies and policies

For details scan the QR code or follow the link

In cooperation with
EU H2020 eArchiving Initiative which
project and the IIP 3D Technical
Specialisation Group

Dear Colleague,

The UNESCO Chair on Digital Cultural Heritage at Cyprus University of Technology, Cyprus invites you to contribute to an important 15-minute survey exploring the future of cultural heritage digitisation. Building on the European Commission-funded VIGIE2020/654 study on quality in 3D digitisation, and the ongoing EU funded Horizon project - HERITALISE this new initiative seeks to go beyond Digital Twins by introducing the Memory Twin concept?an evolution of 3D digitisation that integrates data, metadata, paradata, and interpretative layers within a broader organisational and strategic framework.

This survey will run until the 31st of May 2025. Your insights will help assess institutional readiness, uncover barriers and opportunities, and inform future strategies and policies for capacity building and cross-sector collaboration. Whether you are a **curator, researcher, technologist, or policymaker**, your input will **directly influence the development of next-generation standards and methodologies for digital cultural heritage**.

The survey can be taken [here](#).

We thank you in advance for your valuable contribution to shaping the future of heritage digitisation.

Best Regards

The [UNESCO Chair on Digital Cultural Heritage](#), [Heritage Malta](#), the Memory Twin Alliance & the [HERITALISE project](#) research team.
